

# Shiny App Output Interpretation

## Valence:

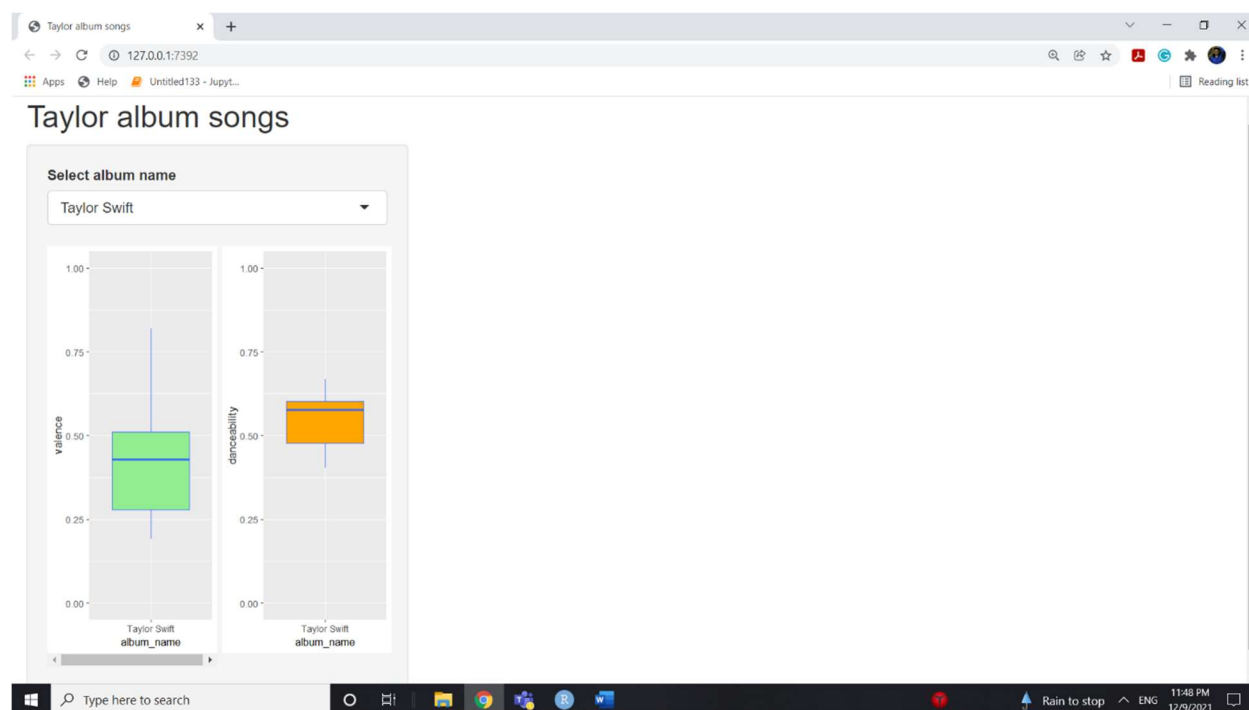

As Valence is a factor that conveys musical positiveness (0: Sad and 1: happy). We notice that the median valence across all albums does not exceed 0.5, we can say that most of her song collection is on the sadder end of the spectrum

## Danceability:

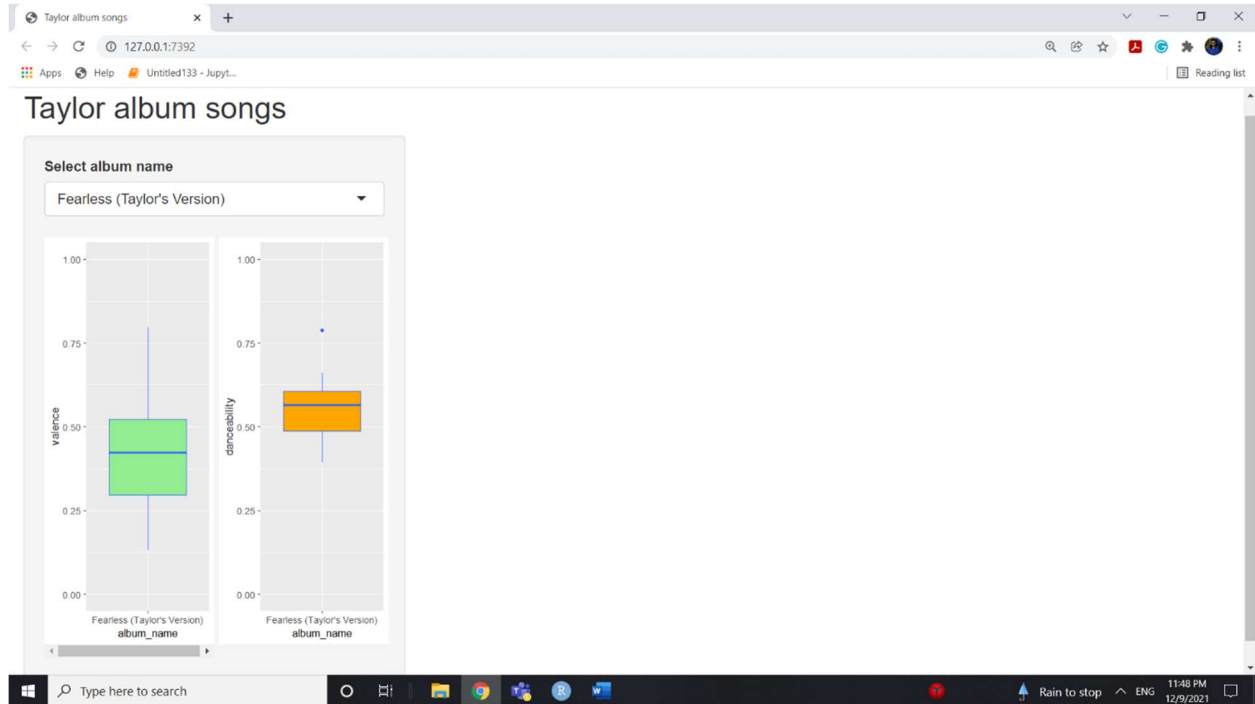

Taylor's albums - 1989, Red and Lover are seen to have higher median danceability scores which is not a surprise given the association of these albums was Taylor's pop era.

The below plots show us the valence and danceability across each album.

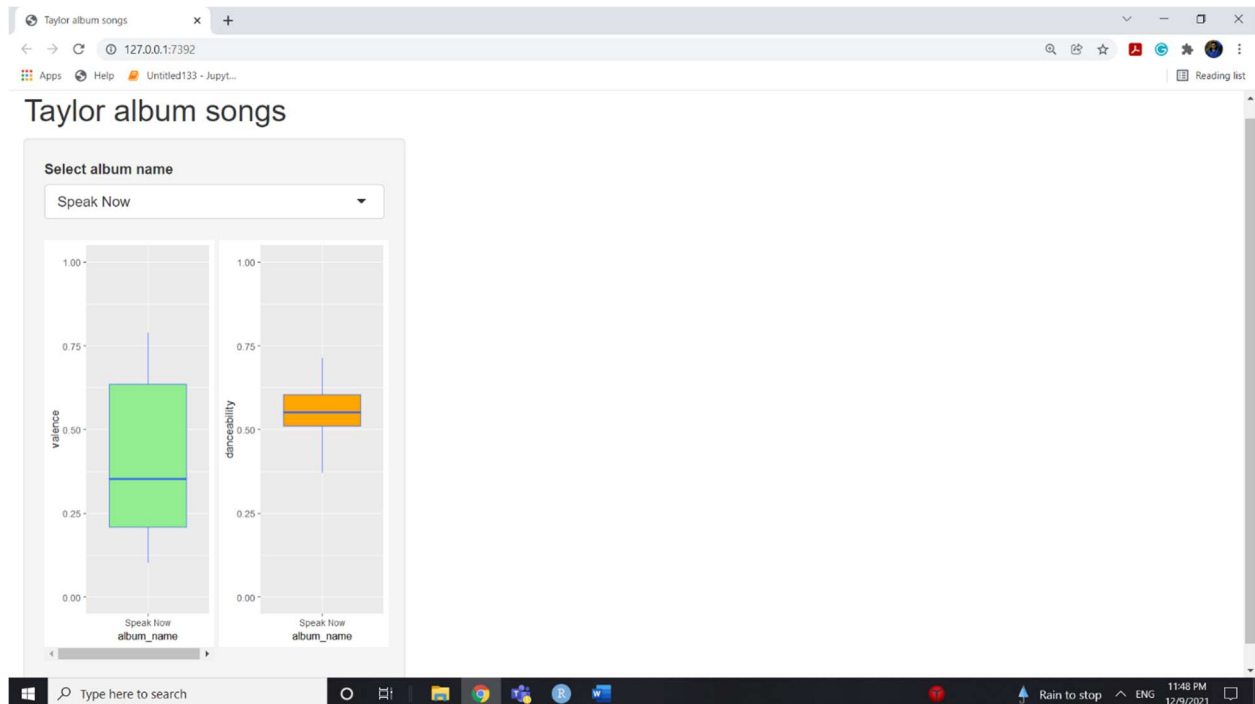

## Album Name – Taylor Swift:

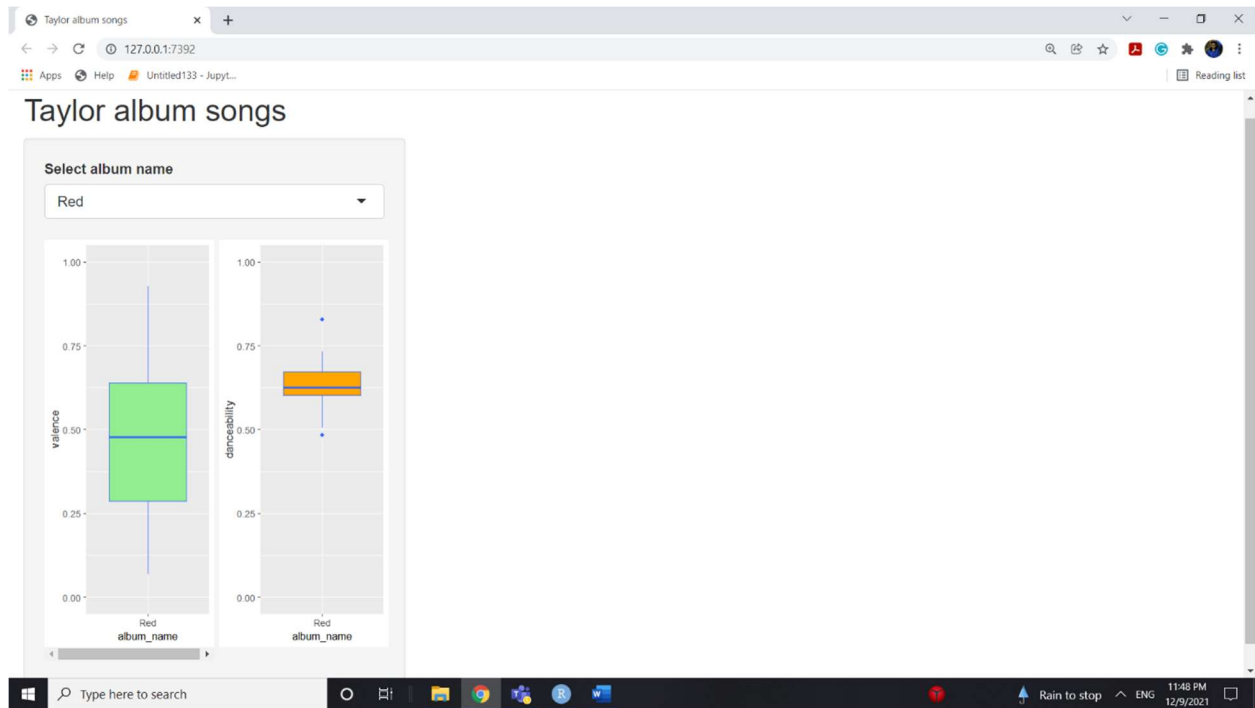

## Album Name – Fearless (Taylor’s Version):

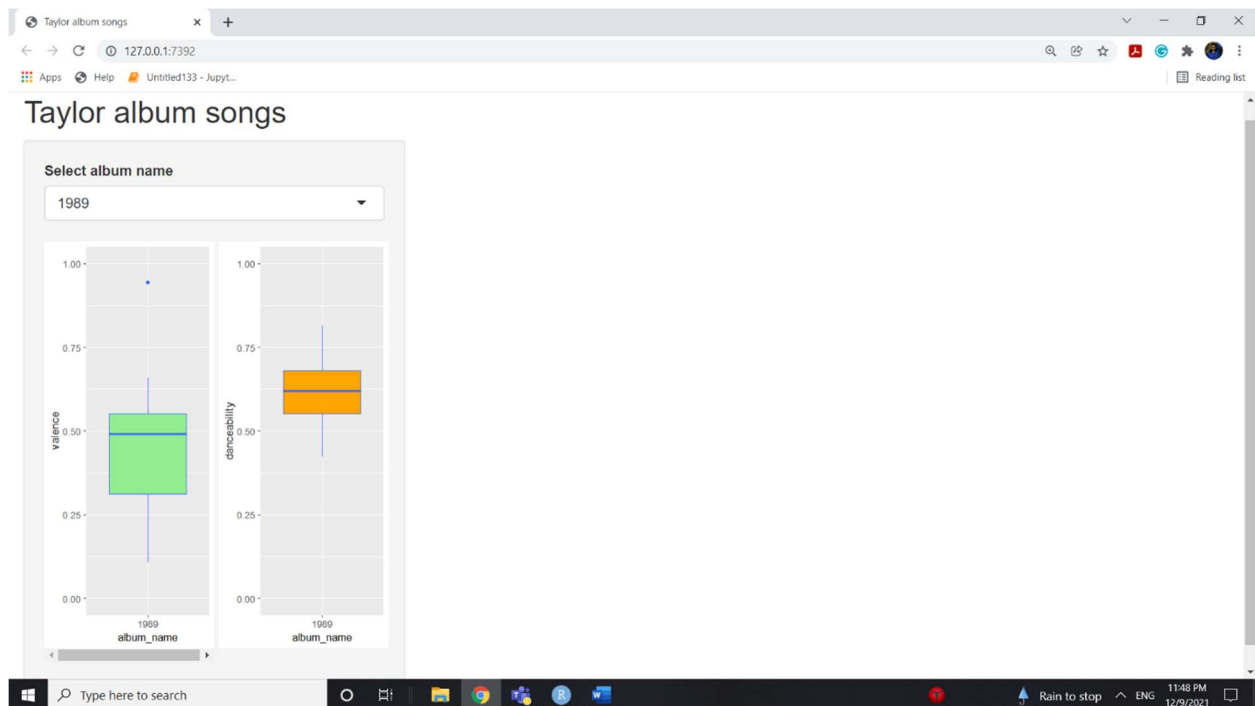

## Album Name – Speak Now:
